

APEX DYNAMICS, INC.

AE / AER Series

Planetary Gearboxes
High Precision
High Speed

Stainless

AE / AER Series

Characteristic Highlights

Equipped with **solid uncaged needle roller bearings**, provides maximum contact points to increase stiffness and transmit high output torque.

A high setting gear performance is achieved by using our **HeliTopo technology**. This **eases off the tooth profile** and **crowns the lead of each tooth**. This optimizes the gear mesh alignment and overlap to achieve maximum tooth surface contact.

Our **in-house plasma nitriding** heat treatment process maintains the tooth surface hardness at **900Hv** for superior wear-resistance and a core hardness at **30 HRC** for toughness.

One piece planet carrier with extended bearing design provides maximum radial load capacity and increases system reliability and stiffness.

True helical gear design

Precision helical gearing increases tooth to tooth contact ratio by over 33% vs spur gearing. The helix angle produces smooth and quiet operation with decreased backlash (less than 8 arc-minutes and $\leq 56\text{dB}$).

Patented planet carrier design puts the sun gear bearing directly into the planet carrier. It minimizes gear misalignment to gain higher accuracy.

Triple split collet with dynamic balanced set collar clamping system provides backlash free power transmission and eliminates slippage. 100% concentricity allows for smooth rotation and higher input speed capability.

Lubrication by **synthetic Nyogel 792D grease** for smooth operation over the whole service life, regardless of mounting orientation. Sealed to **IP65** standard for protection and maintenance-free performance.

Patented sealing system featuring a TiCN coated shaft surface that eliminates leakage and increases service life to over 20,000 hours. The high tech coating, with a surface quality of $0.2 \mu\text{m}$ and hardness of 3700 Hv. Interfaces with our proprietary seal, decreasing wear and running temperature.

AER Series

AER version with 90° input via helical bevel gear. Featuring an extremely short, light yet rigid housing and full compatibility with standard motor adapters.

AE Series
